- 9. Soundproofing**
- 10. Fire retardant**
- 11. Fungal and termite proof**
- 12. Strong**

Sliding Door

It opens horizontally by sliding, usually horizontal to a wall. Normally sliding doors are used for saving space.

Casement Door

1 or 2 leaf that is attached to its frame by one or more hinges at the side. They provide excellent sound insulation.

Sliding Folding Door

Stackable doors that fold at multiple panel hinges, and also slide and stack perfectly to one or more sides.

French Door

French doors are crafted with Georgian bars or security grill. It adds to the beauty and security of your home.

Sliding Window

Window made of 2 or more shutters open horizontally and easier to operate. They have bug mesh option too.

Casement Window

Hinged at the side and open outward like a door, provides exceptional airflow and better noise insulation.

Vertical Sliding Window

Vertically moving with self weight balance.
Recommended for taller openings.

Combination Window

Sets of different window styles combined together to
build a robust and attractive frame.
